

Example L^AT_EX source for creating a truth table

For example, to draw the truth table for $p \wedge q$:

p	q	$p \wedge q$
T	T	T
T	F	F
F	T	F
F	F	F

the L^AT_EX source file (.tex file) content would be:

```
\begin{displaymath}
\begin{array}{|c c|c|} % |c c|c| means that there are three columns in the table and
% a vertical bar '|' will be printed on the left and right borders,
% and between the second and the third columns.
% The letter 'c' means the value will be centered within the column,
% letter 'l', left-aligned, and 'r', right-aligned.
p & q & p \wedge q \\ % Use & to separate the columns
\hline % Put a horizontal line between the table header and the rest.
T & T & T \\
T & F & F \\
F & T & F \\
F & F & F \\
\end{array}
\end{displaymath}
```
