

**CSCE 666: Pattern analysis  
Texas A&M University**

**PEER REVIEW FORM**

**Project title:** \_\_\_\_\_

**Your name:** \_\_\_\_\_

As discussed in class, your final grade on the project will be weighted by your overall participation, as measured by your team members. Please evaluate your team members on the basis of (1) their effort (e.g., number of hours) devoted to the project, (2) their technical contributions to the project, (3) their dependability to get their portion of the work completed on time, and (4) their overall grade. You are also asked to rate for yourself according to these measures.

Please use a rank between 0 (very poor) and 5 (excellent). A rank of 0 will be assumed for blank entries.

<b>Team member name</b>	<b>Effort devoted</b>	<b>Technical contribution</b>	<b>Dependability</b>	<b>Overall grade</b>
Yourself				

Any additional comments you would like to bring to my attention? Praises, concerns, etc.

Please return to Dr. Gutierrez in room HRRB 506A.
